

Sysnet is a software product company engaged in large software solutions and IT services over the last 15 years. Sysnet has come out with a path-breaking and innovative software product called **SpApp**, to create and manage enterprise business applications with no coding or usage of databases. Using SpApp, several systems are already deployed. SpApp saves time and money for customers.

Sysnet has designed and developed a software product called "**KwikLab**" for Laboratory/Diagnostics Centers. "KwikLab" is based on Sysnet's ultra-modern technology called SpApp. It is easily maintained without IT Staff and does not require any third party database.

Key features of "KwikLab – Laboratory/Diagnostics Management System":

The various business tasks in KwikLab are grouped under different Modules. The modules are integrated, with emphasis on best industry practices.

KwikLab comes loaded with various tests along with the reference value.

I) Lab Management:

In this module record detail of all tests conducted for a patient.

- ◆ **Lab Tests:** The list of various Tests/Scans/X Rays that are conducted in the Lab are defined and maintained along with the reference values and rates.
- ◆ **Lab Service:** Tests to be conducted for a patient can be selected quickly. Once the Tests are completed the results can be entered. The reference value for the test is auto displayed for comparison. An option to enter a special note on the result is also provided.
- ◆ **Lab Report:** Generate a formal report on the tests carried out for a patient along with the actual test result and reference value. The report can be directly sent to the patient through Fax or Email.
- ◆ **Lab Bill:** A detailed bill showing the charges for each test can be quickly generated and printed.
- ◆ **Lab Receipts:** Record income generate through the Lab. A formal receipt can be printed and a report showing the income for any given periods can also be printed.

II) Masters:

In the Masters module the master data for the Lab can be defined.

- ◆ **Items Master:** The list of various items purchased and stocked in the defined. Items like Consumables, Lab Equipments, etc can be defined. These items are referred while creating a Purchase Order or GRN.
- ◆ **Patient:** The registration of a new Patient is done in this profile. Complete details of the patient can be entered. A Patient Register can be generated and printed for a given period.

III) Purchase Management:

In this module Purchase Orders can be prepared & sent to the supplier and Goods Receipts Notes for the Items received can be recorded.

- ◆ **Supplier:** Maintain a list of all your suppliers along with the contact details.
- ◆ **PO:** Raise a formal Purchase Order on your suppliers. POs can be directly sent to the Supplier's through Fax or Email.
- ◆ **Goods Receipt Note (GRN):** Create a Goods Receipt Note for the Items received. Stock and Account Payable is auto updated.

IV) Stock Movement:

In this module the details of Items Issued for daily use, expired or returned to supplier are recorded. Closing stock is auto updated. A report showing the details of Stock Movement can be generated for a given period.

V) Accounts:

KwikLab supports a complete yet a simple accounting system with complete Book-keeping and statutory statements.

- ◆ Maintaining Cash/Bank Books.
- ◆ Bank Reconciliation for multiple bank accounts.
- ◆ Accounts Payable can be maintained and an Age-wise creditors statement can be generated.
- ◆ Prepare Debit/Credit Notes.
- ◆ Multiple accounting years can be maintained.
- ◆ Trial Balance, P & L Statement, Balance Sheet and General ledger can be generated any time.

General features:

- ⇒ KwikLab is built using Sysnet's Enterprise AppMaker - SpApp.
- ⇒ KwikLab does not need any third party database like MS-SQL Server or Oracle.
- ⇒ KwikLab can be easily maintained, without Programming.
- ⇒ KwikLab data can be backed up, using menu options.
- ⇒ Export the data to CSV, Txt or Dat file.
- ⇒ You can select and purge old data.
- ⇒ Context Sensitive Help - Press 'F11' to quickly get help on a particular topic of KwikLab.
- ⇒ Press 'F1' to quickly get help on how to use a particular feature of SpApp.
- ⇒ Data is secured through encryption and compression.
- ⇒ Define users with specific access control.
- ⇒ Preview reports before printing.
- ⇒ Save report as an image file (png, jpg or gif).
- ⇒ Sent save reports as an email attachment directly from KwikLab.
- ⇒ Specify alerts to act as personal reminders.
- ⇒ KwikLab can be upgraded from Professional edition (single-user) to Enterprise edition (multi-user).
- ⇒ KwikLab requires Microsoft Windows OS with .Net frameworks, on a PC (P IV / 512 MB).

Summary:

KwikLab is a complete Laboratory/Diagnostics Management System suitable for any small & Medium size Labs. KwikLab comes loaded with various tests along with the reference value. It is easily maintained without IT Staff and does not require any third party database. It supports changes in Business Logic, in simple English.
