

KwikUpgrade is a Technical Software Product to upgrade any Kwik Business Software Product License.

KwikUpgrade is used to upgrade KwikBizLite/KwikPayLite (& eight more products planned for future release)

KwikUpgrade is simple and easy-to-use. It can be used by you without IT staff, on your Windows-based network.

Features:

- ⇒ KwikUpgrade runs on any Microsoft Windows-based Operating system (XP or later).
- ⇒ You need a Windows-based LAN at your workplace, to use KwikUpgrade.
- ⇒ Each KwikUpgrade CD increases the License Availability, by ONE.
- ⇒ Each KwikUpgrade CD upgrades ONE Kwik Business Product License only.
- ⇒ In case you need multiple upgrades, procure multiple KwikUpgrade packages.
- ⇒ KwikUpgrade can even make an XP computer to a Server. Microsoft Server OS is not required.
- ⇒ KwikUpgrade can make any (XP or later) computer to a Node.
- ⇒ KwikUpgrade does not work on Windows 3.x/95/98 Operating systems.
- ⇒ KwikUpgrade establishes the Kwik Product License as Server License.
- ⇒ KwikUpgrade establishes another Computer in the network, with the Kwik Product Node License.
- ⇒ KwikUpgrade needs Administrator privileges on Server & Node, to work right.
- ⇒ KwikUpgrade is complete in itself, to upgrade the Product License and to install a Client.
- ⇒ KwikUpgrade does the job in minutes and saves you time.
- ⇒ Check Help by pressing F1 Key, while running KwikUpgrade.
- ⇒ KwikUpgrade does not take care of any Business functions or topics.
- ⇒ KwikUpgrade upgrades Kwik Products of Version 2 or later.
- ⇒ KwikUpgrade is future-ready. It would work on any new Kwik Product Release.
- ⇒ Typically, new computers or hardware upgrades are not required. Recommended if volumes are high.
- ⇒ It is recommended to check Computer Performance facility in your Kwik product and decide.
- ⇒ KwikUpgrade CDs can make multiple Kwik Products as Servers on same computer (not recommended)
- ⇒ You can upgrade your Kwik Product License by ONE with one KwikUpgrade CD. There is no upper limit.
